

ScrumDo Process Map

Please follow this process map for all tasks completed on Scrum.

If you have any problems or question this contact me. I'm trying to keep things uniform to reduce confusion.

Also be sure to keep track of your time. You should add the Rabbit plugin for tracking. Doing this takes one step out of the process.

Check the next page for screen shots on how to navigate ScrumDo

ScrumDo

Not User Friendly / AndroidSMIL / Phase 1 / Scrum Board

Todo

#27 Rewind

As a User, I would like to be able to rewind a SMIL presentation that is currently playing.

Tasks

#E1

#25 Object Handling

As the program, I need to be able to retrieve the objects, and present the data terms of data and positions.

Tasks

#E1

#26 Playing the Presentation.

As a user I would like to be able to play a presentation. Hitting the back button will be equivalent to stopping the player (may not need a dedicated button).

Tasks

#E1

#31 Pausing a presentation

As a user, I would like to be able to pause the presentation.

Tasks

#E1

#1 Adding pictures

As a user I want to be able to add a picture to my presentation.

Tasks

#E2

#2 Move/Resize Pictures

I want to be able to move and resize Images by simply dragging.

Tasks

#E2

#3 Picking Objects

As a user I want to be able to pick an object to add to my presentation from a list.

Tasks

#E2

#6 Animate Resources

As a user I want to be able to animate a resource by selecting it, giving it a new ending position, and assigning a duration to that animation.

Tasks

#E2 / #E4

#5 Edit/Delete Resources

As a user I want to be able to easily edit and delete resources in my presentation.

Tasks

#E2 / #E4

Doing

#40 Handler

As the parser I must provide the xmlparser a handler to properly interpret the XML data.

This is the Scrum Board. Once you have navigated to the project, go to phase 1 (iteration), then on the right side under tools you'll see the scrum board link. This is the easiest place to work with the stories, plus it gives the best visual of where we stand.
